ENTERPRISE CHANGE AND WORKFORCE READINESS

Change Management and Training Administration

Dear Hiring Team,

I help organizations turn business and technology change into clear communication, practical learning and coordinated employee support. I am interested in opportunities where change management and training administration work together to prepare people for new systems and ways of working. I bring more than 15 years across learning, training leadership and enterprise delivery, including experience in regulated financial services.

At American Express, I coordinated and hosted 60+ live enablement sessions across six global time zones for a three-month Jira Data Center and Rally-to-Jira Cloud migration. The program affected approximately 60,000 people across seven user groups. My contribution combined training videos and presentations, SME demonstrations, moderated Q&A, communications, feedback analysis and reporting. That experience has taught me how to keep delivery organized while adapting support to different audiences and evolving questions.

I use feedback to make change support more useful. By reviewing Qualtrics surveys, session chats, transcripts and stakeholder input, I helped surface recurring needs and inform a shift toward more interactive demonstrations and Q&A. I use AI-assisted analysis to organize themes, with human review and judgment guiding recommendations. My broader work includes learning and adoption support for Confluence Cloud, SAP Fieldglass and data center initiatives.

At Charles Schwab, I connected instructional design with project and product delivery, supporting onboarding, compliance, client-facing tools and technology adoption. Learning journeys and SharePoint hubs helped organize role-specific resources. My training and quality leadership at Concentrix, corporate training at Gatestone and consulting through LAJH Endeavors add depth in SME partnership, scheduling, content development, coaching and performance support. I can both coordinate the learning operation and produce the materials it needs.

I would welcome a conversation about your change priorities, workforce needs and training operations. My portfolio pairs enterprise project examples with playable samples that show how I translate complex information into useful learning. I would bring clear communication, dependable coordination and a practical focus on helping people adopt change.

Sincerely,

Lorne Hopkins
